# COST OS

The most innovative and complete cost estimating software – fast, simple, accurate and reliable.
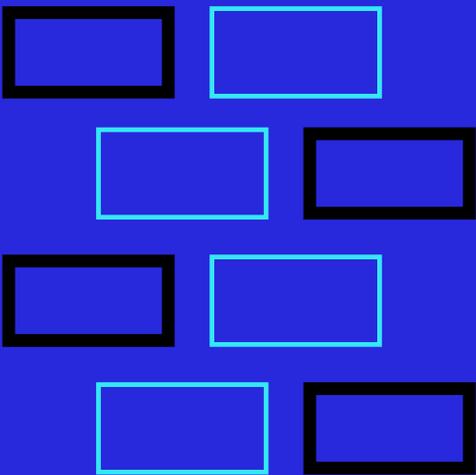

That's right!

The most innovative and complete cost estimating software, covering all estimate classes of projects in:
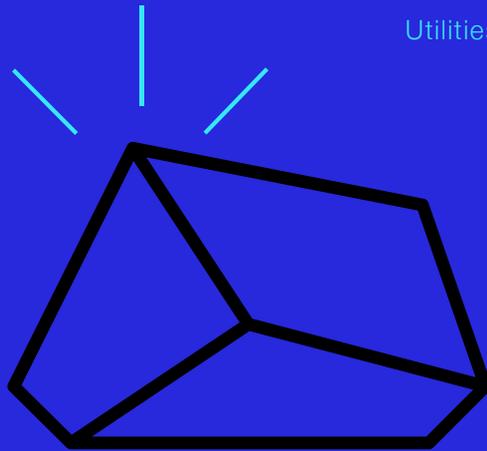

Engineering Procurement and Construction (EPC)

Utilities

Building Construction

Mining

Oil & Gas

Infrastructure

Work more efficiently
with increased accuracy and unrivalled speed!

Migrate Quickly

Import existing data quickly and configure your existing methodologies easily.

Collaborate

Set up roles, permissions and experience real multi-user functionality.

Automate

Improve estimating speed and integrate your data and processes.

Optimise

Parametrise your estimates and bids to deliver value engineered, cost optimised estimates.

Acquire External Knowledge

Access multiple commercial knowledge bases, international measurements standards, codings and best estimating practices.

Innovate

Improve your estimating intelligence through technology.

The continuous evolution of CostOS is the actual proof of our team's ability to transform its knowledge into solutions to meet the needs of our clients:

|				
Real multi-user experience	User teams for better control	Permissions and roles	SQL Server	Multiple International Estimating Standards
Deploy locally or over the Cloud	Configurable & adjustable	Big data, Mega Project ready	Fully documented API	Link you BI & dashboards

Out of the box integrations

GIS

BIM: Takeoffs,
Model auto-pricing
and auto-revisioning

MS Office

2D Drawings

P6,MS Project,
ASTA: Resource loaded
schedules from the Estimates

RSMeans, BCIS,
ICE CESMM4,
POMI, Richardsons,
GF, Pipeserv:
Multi-discipline commercial
Cost Knowledge bases

Strong parametric estimating engine enabling engineers and estimators
to build multiple types of smart assemblies for:

Conceptual
estimates

Detailed
estimates

BIM based
cost models

For pricing LOD 100-200
models with estimators'
assumptions

BIM based
auto-pricing
models

For pricing
LOD 300 – 400 models

CostOS. Simplicity is Power.

The continuous evolution of CostOS through close work with our customers and our commitment to Research and Development is real proof of our ability to deliver practical solutions that meet today's and future needs of our clients:

- Real multi-user experience
- User teams for better control
- Permissions and roles
- SQL Server
- Multiple international estimating standards
- Local or Cloud deployment

- Configurability and adjustability
- Big Data, Mega Project Ready
- Fully documented API
- Link your BI & dashboards
- BIM, GIS and 2D Takeoffs in one platform

CostOS is the 1st choice when it comes to cost estimating software
