

# OxiFit

Rapid Breath Test for  
Free Radical Levels / Oxidative Stress

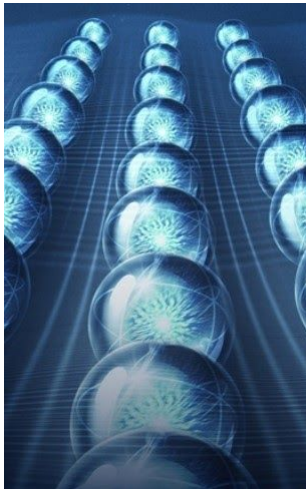

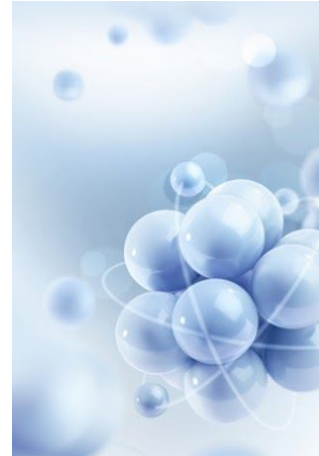

**Boost your Immunity and  
Protection against Infection!**

**Free Radicals are the toxic by-products of everyday life, and can result in oxidative stress.**

**High levels of free radicals are an important indicator of good health and wellness, and help to boost the body's natural defenses against infectious agents.**

**Now, free radical levels can be determined in minutes with OxiFit.**

**OxiFit results empower you to keep your free radical levels low and your immunity high!**

Enables optimal health and wellness management with digital results tracking

Rapid, Painless, Non-invasive

Only takes 3 minutes

Compact and portable, it can be used anytime, anywhere.

Innovates and revolutionizes health and wellness

**Take control of your health!**

**Optimize your protection  
against infection!**

Akers Nanotechnology, Inc. ("Akers Nano") develops, manufactures, and supplies rapid mobile health tests ("mHealthTests™") based on proprietary nanotechnology platforms which provide instant information about health and metabolism for a healthy lifestyle using digital applications.
